is three years.

14. Estimated time required to complete the application of water to beneficial use	
15. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or ann consumptive use:	
This is an application for a temporary permit to allow Twin Creeks Mine	
to continue pumping DW-5 for the period of one year. DW-5 is currently permitted under 57725-T as granted by NDWR in September, 1992. DW-5 is	
used to dewater the pit and provide water for the milling and heap leach mining complex. The consumptive use is 724 afa. Water is commingled	
with water from other SFPG Twin Creeks Mine permits.

APPROVAL OF STATE ENGINEER	
This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to following limitations and conditions:	
This temporary permit to change the point of diversion, place of use and manner use of a portion of the waters of an underground source as heretofore granted unpermit 52051 is issued subject to the terms and conditions imposed in said Permit 52 and with the understanding that no other rights on the source will be affected by change proposed herein. This temporary permit specifically allows for the dewater of the pit area in addition to mining and milling purposes previously authorized. Well shall be equipped with a 2-inch opening and a totalizing meter must be install and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion work is filed. It is understood that any water obtained as a result of this dewatering operat shall be used first by the permittee for mining, milling, heap leaching, drilling, rewatering and other related mining and milling uses herein after referred to as min and milling uses within the described place of use on this permit. A monthly report shall be submitted to the State Engineer within 15 days after end of each calendar quarter which shall include: the volume of water pumped from each well, the rate of diversion pumped from each well, the measurement of pumping wallevel (drawdown) from each well, and the volume of water consumptively used for min and milling uses, project wide. (CONTINUED ON PAGE 2)	
The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not	
exceed	
acre-feet annually.	
Work must be prosecuted with reasonable diligence and be completed on or before	
Proof of completion of work shall be filed before	
Proof of completion of work shall be filed before	
Proof of the application of water to beneficial use shall be filed on or before	
Map in support of proof of beneficial use shall be filed on or before

(PERMIT TERMS CONTINUED)

The State Engineer retains the right to regulate pumping from the dewatering project and/or any other groundwater withdrawals herein authorized to protect the public interest and existing rights. Any water pumped and not used for mining and milling purposes shall be injected or infiltrated back to the Kelley Creek Groundwater Basin. It is understood that this right must allow for a reasonable lowering of the static water level.

The State Engineer will retain the right to require additional monitoring. The permittee, on a schedule acceptable to the State Engineer, shall prepare and present an update on the activities of the mine and the monitoring on a periodic basis, but not less than two times per year.

All of the above stated conditions are issued subject to having no adverse impacts on existing rights.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030.

The total combined duty of water under Permits 49633, 49634, 50853, 50854, 52046, 52047, 52048, 52049, 52050, 52051, 53339, 53340, 53341, 58919-T, 58920-T, 59012-T, 59202-T, 59203-T, 59220-T, 59348-T, 59349-T, 59386-T, and 59387-T shall not exceed 6,121.0 acre-feet annually.

This temporary permit is issued subject to the terms and conditions set forth in the State Engineer's Ruling No. 3606, dated May 19, 1989.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on April 19, 1995 at which time all rights herein granted shall revert to the right being changed by this temporary permit.
